# Welcome to the Lux Family

Purchasing a Lux product isn't just another purchase, it's a purchase backed by a company that aims to provide New Zealanders with a quality Bright home for Life. By purchasing a Lux you join the Lux Family. From humble beginnings manufacturing gas lamps in Sweden in 1901, Lux has become a world leader in quality household appliances.

Our interest is not just in the families of today but in the families of future generations. We aim to ensure they are able to lead a happy life in a clean environment. This is why, ever since 1992, environmental protection has been firmly Entrenched as one of the corporate goals and guiding principles of the Lux Group. Both the products themselves and the way they are manufactured adhere to the underlying principles of this environmental policy. Helping New Zealander provide their family, friends and businesses with a bright, hygienic and healthy home or workplace is another goal of Lux.

Here at Lux we Support the most important job in the world. It is hard to believe that one of the most important jobs in the world earns so little recognition. Yet the mothers and fathers who manage a family often perform real juggling acts. Lux New Zealand has a real commitment to families and our business partners operate in both part time and full time capacities which allow them not only to provide income to support their families but offers flexible working hours allowing them to spend the time they really want on family activities.

Lux New Zealand offer strong Quality Assured Warranties to stand behind the high quality products they supply, these warranties vary between machines, but are supported by a nationwide network of specifically selected quality Service agents to ensure you are able to get the support you need, when you need it. All our products are tried and tested so you can be sure that when you buy Lux you buy quality.

The Lux philosophy is for all families to have a bright and healthy home. "A healthy home is a happy home" and here at Lux we don't believe it should be difficult to achieve. This is why our products have the most advanced technology in filtering, performance and low energy consumption in the world. These factors mean that as a end result you save on costs, and have increased efficiency, giving you the time you need to focus on what really counts, and spend more quality time doing the things you enjoy most in life.

# All about Inbuilt machines...

Inbuilt Vacuum Systems are fast becoming, the easy, modern way to keep your home clean.

When designing your inbuilt machines installation, outlets are placed in convenient locations throughout the home to ensure that you can reach every corner of your home with ease.

The Inbuilt Vacuum Systems supplied by Lux NZ are of an outstanding quality, with several models available to suit the requirements of your home. Inbuilt machines are able to be designed into the build of new homes, or retro-fitted into existing homes.

With the unit itself either tucked away in the garage or under the bench, Inbuilt machines eliminate the need for extra storage space, instead all you need is room to store the hose.

The Inbuilt System does not require movement from one power inlet to another any more frequently than the standard vacuum cleaner requires you to move the plug, coming with a stunning 10m action radius (inclusive of tube) you can provide a clean, fresh and healthy environment with minimal effort.

Research has shown that pollution in the house and in the air is about 100 times more inside than it is outside, these dust allergens inside are the leading cause of asthma. Because of this, the importance of having a high quality vacuum that can efficiently remove these particles from the air and ensure that they are not redistributed throughout your home is increased.

With a Inbuilt System supplied by Lux you can rest assured knowing that you are providing a clean, healthy environment for you and your family.

With a name and reputation stretching as far back as 1926 in the New Zealand Vacuum Cleaner market, Lux New Zealand is proud to launch our New range of In-Built Vacuum systems.

Lux New Zealand has been selling In-builts for over 20 years into the New Zealand market, meaning we know what works. The inbuilt range on offer have been trialed, tried and tested for the rigours of the kiwi home, these models represent the best value for money available.

When installing a In-Built machine supplied by Lux you will enjoy these benefits:

- Best value for money on the market with quality delivered far beyond price point expectation.
- Unsurpassed warranty period... your guarantee that our systems are the most reliable.
- High energy efficiency. Our units outperform the competition through decades of research into highly efficient air flow systems. Bigger motors don't mean better suction and a Lux system has struck the fine balance between a smaller motor with more suction power.
- Cutting edge technology designed to clean your client's home in a hassle free way for years to come.
- Dealing with a kiwi company with nationwide parts and service that has been around longer than anyone in the market. Our systems have been cleaning kiwi homes for nearly 100 years...now that's history and peace of mind that you can bank on.
- Hybrid technology that can be operated with or without a vacuum bag.
- Dealing with vacuum professionals that have never done anything but vacuums and understand the cleaning needs of your client without you having to
- A reputation that you can be proud and rest assured in selling on to your valued customer.

At Lux we understand that building, upgrading and selling a home are all very challenging. We also understand that making a decision to instal an inbuilt machine can be a bit daunting, but we have people available to help you through the entire proces with minimum effort.

# Our Inbuilt Range

## EcoDUCT 5

Maximum Outlets:  
5

Motor Size:  
1200W

Bag Capacity:  
20L

Service Area:  
50m

The EcoDUCT 5 is the smallest of our Inbuilt machines, typically installed as an underbench model, the EcoDUCT 5 is designed for the small—medium sized home and can power up to 5 outlets. EcoDUCT5 is also ideal for installing in small cupboards in existing homes.

The EcoDUCT5 has been designed with simplicity and convenience in mind, the small compact size of the unit (450mm High x 280mm diameter) means that you can install it almost anywhere in your home without compromising storage space

The Small size of the EcoDUCT is by no means a reflection of its ability, powered by a high quality 1200w motor with a 20L bag capacity, the EcoDUCT5 is a small machine that produces big results.

## EcoDUCT 7

Maximum Outlets:  
7

Motor Size:  
1650W

Bag Capacity:  
20L

Service Area:  
60m

The EcoDUCT 7 is the mid range for size in our range of Inbuilt machines, the EcoDUCT 7 is designed for the medium sized home and can power up to 7 outlets, typically this machine is the most common machine that suits a wide variety of New Zealand homes.

The EcoDUCT7 has been designed for the family home. Able to support up to 7 inlets, powered by a high quality 1650w motor, and with a 20L bag capacity, the EcoDUCT7 requires emptying up to seven times less than standard portable home vacuums.

The EcoDUCT7 is normally mounted in the garage where it is tucked away out of sight allowing you to maximise all your internal storage areas. With a 60m service area this machine is capable of sufficiently servicing most family homes.

## EcoDUCT 9

Maximum Outlets:  
9

Motor Size:  
1800W

Bag Capacity:  
20L

Service Area:  
75m

The EcoDUCT9 is the largest of our Inbuilt machines, typically installed in homes with a large floor areas or light commercial applications, where there is a need for more outlets. The EcoDUCT9 is capable of powering up to 9 outlets with a single Vacuum unit.

The EcoDUCT9 has been designed with large homes and smaller commercial areas in mind, such as rest homes and hotels.

This machine is generally installed in the garage. With a service area of 75m the EcoDUCT9 is high quality, high performance machine.

Powered by a high quality 1800w motor and electronic controls with a 20L bag capacity, the EcoDUCT9 is more than capable of servicing large homes for multiple cleans.

# What's right for you?

## Accessories

Inbuilt machines have a wide range of accessories, meaning you can tailor your purchase to include exactly what you require - no more purchasing of costly accessories that you don't want or need. This means you can keep your budget in-tact and not have any un-necessary components that would otherwise sit around causing clutter.

The accessories range includes;

Wall outlets (otherwise referred to as Inlet Valves) for mounting around the home and plugging your hose directly into.

Floor tank - the best thing for your hard floors. Finally someone has designed a vacuum for the Kitchen and other hard floors that removes the hard work. The floor tank is a "toe click" system that is discretely installed under the cabinets with a flush front and when clicked into action the vacuum cleaner activates and you can literally sweep all your rubbish under the bench (only now its safely sucked away never to be seen again!)

Hose - most places only need one, you simply plug it into your wall outlet and away you go! Coming in a standard 9m length, you get the benefit of a wide action radius without the hassle of dragging a machine along behind you.

Hose-Soc - Protector sock for your hose, so that when it is pulled around the corners, or you accidentally catch it on a door frame, your paintwork stays intact. The Hose-soc takes away the harshness and provides a soft exterior to ensure that no damage is caused to your home.

Telescopic Wand - The extension from the hose to your foot providing the easy access between the hose end and the floor, ensuring that with minimal effort you are able to get your house looking sparkling and clean. Able to be Fitted with a range of nozzles and floor tools the telescopic wand really is a must have.

Multi-surface floor tool - capable of vacuuming hard and soft surfaces, the Multi-surface floor tool is easy operate, and makes floor cleaning a breeze. With a foot operation for switching between carpets and hard floors, the multi-surface tool makes vacuuming easy in one step.

## Choosing the right Inbuilt for you

The Lux Inbuilt range offers something for everyone, from light residential works, to commercial, we have something that will be right for you. All Lux machines are of a high quality and offer outstanding performance. Choosing the machine that best suits your needs will ensure that all you expectations are met.

Here at Lux we understand that not everyone is an expert on the technical specification and details, and sometimes you just know what you need done. If this is the case, then don't hesitate to make contact with us to talk it over, we're more than willing to help find the machine with the right functionality and fit for your home and business.
